

Implementation Manual

Implementation Manual

The implementation manual contains the system configuration recommended to conduct the course. It also includes the steps to install Visual Studio Professional 2012 on the Windows 8 platform.

Recommended System Configuration

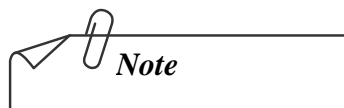

The software required on the faculty and student nodes are:

- Windows 8 Operating System (OS)
- Visual Studio Professional 2012
- Microsoft Office Professional Plus 2010
- Adobe Flash Player 10.2

Installing Visual Studio Professional 2012

To install Visual Studio Professional 2012, you need to perform the following steps:

1. Insert the DVD containing Visual Studio Professional 2012 setup in the DVD drive.
2. Press the Windows and **E** keys together on the keyboard.
3. Double-click the DVD drive icon.
4. Locate the setup file, **vs_professional.exe**.

Note

An Internet connection is required to install Visual Studio Professional 2012.

5. Double-click the **vs_professional.exe** file. The Home page of the **Visual Studio Professional 2012 with Blend** wizard is displayed, as shown in the following figure.

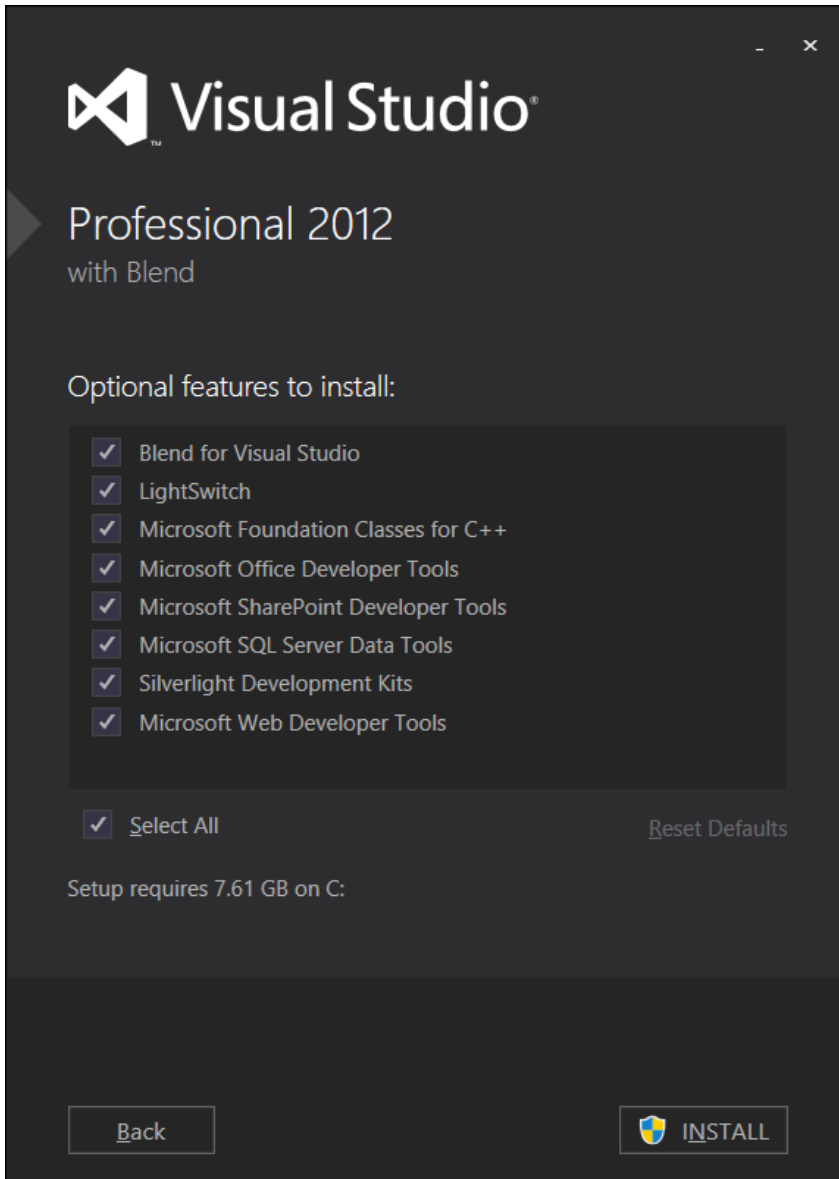

The Home Page of the Visual Studio Professional 2012 Wizard

6. Select the **I agree to the License terms and conditions** check box. The **Next** button is displayed in the Home page, as shown in the following figure.

The Next Button in the Home Page

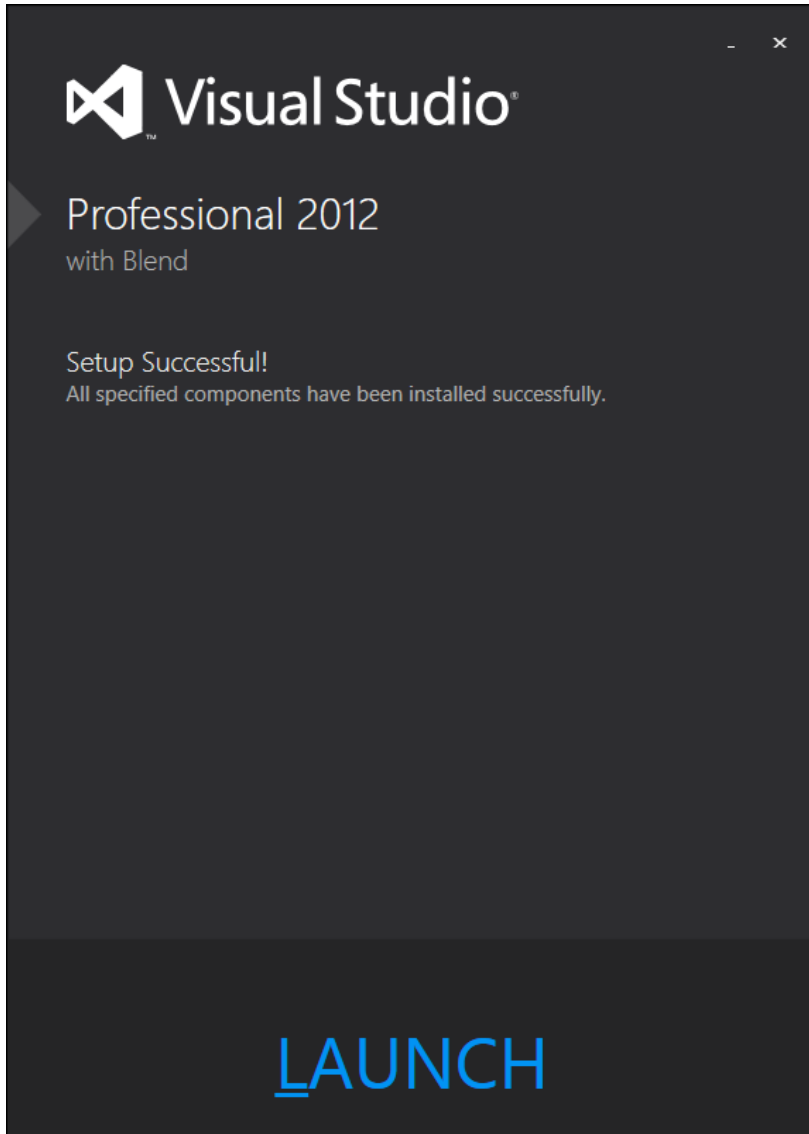

7. Click the **Next** button. The **Optional features to install** page is displayed, as shown in the following figure.

The Optional features to install Page

8. Ensure that the **Select All** check box is selected.
9. Click the **INSTALL** button. The **User Account Control** dialog box is displayed.

10. Click the **Yes** button. Installation of Visual Studio Professional 2012 starts. After a while, when the installation finishes, the **Setup Successful!** page is displayed, as shown in the following figure.

The Setup Successful! Page

11. Click the **Close** button.
